

CC Pace Advisory Strategy—the steps to long-term success.

Simply put, the mission of CC Pace's Advisory Strategy services is to maximize the long-term value of your business and technology hand-in-hand. Today's industry rewards speed and performance. It leaves little to those who cut corners or lag behind.

With two decades of experience in providing technology consulting to industry leaders, CC Pace has proven its value as a technology strategy partner. In those two decades, we've educated our A-list clients on what it takes to stay strong in lean times and keep ahead of the competition.

We align your business and technology goals:

- We evaluate the business landscape (market, industry, customer, competition) and industry best practices based on your business objectives.
- We analyze your use of technology, business application systems, organization, technical infrastructure, technology service providers, and business workflow.
- We identify what you'll need to achieve your goals, opportunities for improvement, and the implications of change.
- We develop a strategy uniquely tailored to your specific business needs and aspirations.

More specifically, our technology strategy focus includes:

- Assessments to plan new technology implementations that maximize competitive advantage
- Multi-year technical plans to enhance infrastructure, staff, and application depth to meet forecasted business needs
- Technical infrastructure reviews of existing systems
- Best practice reviews to identify opportunities for increasing efficiency and effectiveness

CC Pace focuses on providing one to three year plans that offer incremental steps to success and rapid return on investment. The strategy hurdles that you face every few years are obstacles that we clear every day.

Choose **CC Pace** and feel at ease knowing
that your **technology investments** will
be **working for you.**
