CC Pace Launches ICAgile Certified Professional in Agile Team Facilitation (ICP-ATF) Certification Course

FAIRFAX, VA – December 13, 2016 - CC Pace Systems, Inc. (CC Pace), a leading Agile IT services provider, announced today a new offering for ICAgile Certified Professional in Agile Team Facilitation (ICP-ATF) Certification. The course provides in-depth skills necessary to plan, design and facilitate meetings in an Agile environment, using the tools and techniques of professional facilitators.

The facilitation skills obtained through this certification can be applied to real-world Agile meetings, including project and team charter development meetings, release planning, iteration planning, stand-up meetings and retrospectives. Agile is all about flexibility, responding to change and dealing with the unexpected, so these techniques can be used in both technical and non-technical environments.

“This offering covers the planning and designing of Agile meetings and how to facilitate a safe environment in your meetings,” said Philippa Fewell, Managing Director of Enterprise Solutions for CC Pace. “ICP-ATF is a great addition to both our certified classes for individuals and our customized on-site courses.”

CC Pace is a leading provider of Agile software development, Agile training and IT consulting services. Founded in 1980, CC Pace has performed a wide range of training and coaching services for thousands of professionals and has over 35 years of consulting experience. Headquartered in Fairfax, Virginia, CC Pace is a privately held company, serving both commercial and government clients.
