CC Pace Releases White Paper Based on Industry Survey Results

FAIRFAX, VA – December 14, 2017 - CC Pace, a leading mortgage business process and technology consulting firm, has announced a new white paper based on our findings in a recent industry survey conducted by our senior team of consultants. This white paper includes direct input from industry leaders on where they think the market is heading and what challenges they are experiencing.

Earlier this year, CC Pace reached out to a broad cross-section of industry leaders in the mortgage banking field across the country and gained valuable insights on the mix of technology solutions, challenges and future considerations. Those results were consolidated and recently published in our white paper entitled: *“Mortgage Banking & Technology: Lenders’ Perspective”*. This white paper addresses four key priorities that the participating lenders shared with us: enhancing the customer experience, reducing cost to produce, product diversification, and IT security. Additionally, it discusses the future of digital mortgages, FinTech and the increasing reliance on technology in the mortgage space.

“Considering the increased focus on customer experience in lending, the impact of regulatory compliance and quest to reduce the cost of production, it is more important than ever for lenders to obtain the tools and technologies necessary to gain a business advantage”, said Craig Hughes, Managing Director of Financial Services Consulting for CC Pace.

CC Pace is a leading provider of Mortgage and IT consulting services. Founded in 1980, CC Pace is nationally recognized for solving business problems and delivering high-impact results that improve their clients' productivity and competitiveness. As a management and technology consulting firm, CC Pace specializes in the mortgage banking and financial services industry. Headquartered in Fairfax, Virginia, CC Pace is a privately held company, serving both commercial and Government clients.
